

## STATEMENT OF PERFORMANCE

SUCH is a Portuguese non-profit Association whose purpose is to carry out a public service mission, contributing to achieve the goals of the health policy and in particular to the effectiveness and efficiency of the Portuguese Health System.

The SUCH assumes, in their concerns about the efficiency of its associates, as an organization that significantly contributes to the financial sustainability of the National Health Service.

In 2014 we have installed in our fleet Ultimate Cell systems in order to reduce fuel consumption as well as pollutant emissions.

After a 6-months trial period, where it was possible to demonstrate the efficacy of the device in reducing fuel evidenced by our internal monitoring system (decrease of 17.47% in fuel consumption) in ten light vehicles, we proceeded with the installations in 46 trucks.

It was proven the reduction of pollutant emissions in tests of particulate matter emissions in heavy vehicles.

After two years of use, we can state that the average fuel reductions were **16%** in the whole fleet.
